PROFESSIONAL SUMMARY

Full-stack developer with 3 years across financial compliance (Societe Generale) and enterprise CRM (Slingloft Technologies). Currently building Spring Boot + React systems for IAM and regulatory workflows — PostgreSQL materialized views, cron-based audit automation, Apache POI reporting, MSW-driven testing, and react-intl localization at scale. Personal project Clientrade extends this into a full CRM platform with a domain-scoped Claude API chatbot, JWT/ OTP/OAuth2 security, MySQL trigger audit trails, and automated health monitoring.

TECHNICAL SKILLS

- **Languages & Core:** Java (OOP, Collections, Streams, Java 8+), JavaScript.
- **Backend:** Spring Boot, Spring MVC, Spring Security, Hibernate / JPA, REST APIs, Cron Scheduler.
- **Frontend:** React.js, Thymeleaf, JavaScript/jQuery, AJAX, HTML5/CSS3, Bootstrap, Tailwind CSS.
- **Databases:** PostgreSQL (Materialized Views), MySQL, Oracle, Spring Data JPA, Liquibase.
- **AI Integration:** Claude API — domain-scoped, context-aware, prompt engineering.
- **File / Export:** Apache POI (Excel .xlsx), ITextRenderer / Flying Saucer (PDF).
- **Security & Auth:** JWT, OAuth2 (Google/GitHub), OTP Auth, Spring Security, Rate Limiting, DB-trigger audit trails.
- **DevOps / Tools:** Git/GitHub, Maven, GitHub Actions, SLF4J, JavaMailSender.
- **APIs & PWA:** Web OTP API, Contact Picker API, Geo Code API, PWA.
- **JUnit 5:** Proficient in writing and executing **unit tests** for code quality and reliability.
- **Microservices Architecture:** Exploring **scalable** and **maintainable** application design concepts.
- **Data Visualization:** Experienced in creating **dashboards** and **graphs** using **Ajax, jQuery, and Spring Boot**.
- **Messaging & Cloud:** Apache Kafka, Redis (caching), Amazon S3 (StreamTransferManager, multipart upload), Docker.
- **i18n & Testing:** react-intl (500+ translations), MSW (API mocking), JUnit 5, Spring LocaleResolver.

PROFESSIONAL EXPERIENCE

Societe Generale | Financial Compliance & IAM | Spring Boot + React 2024 – Present · Bengaluru, India

- **PostgreSQL Materialized Views:** Designed end-to-end data handling with materialized views delivering 5× faster search performance; reusable React server-side tables reduced UI duplication by ~70% .
- **Cron Automation & Audit Trail:** Built backend cron schedulers with full audit-trail tracking, improving SLA compliance by ~40% and ensuring complete traceability across financial regulatory workflows .
- **Apache POI Excel Automation:** Developed IAM and compliance Excel reporting tools, reducing manual effort by ~80% for identity access management data collection.
- **MSW API Mocking:** Enabled frontend independence using Mock Service Worker, increasing test coverage by ~65% — React components tested against realistic API shapes without backend dependency.
- **react-intl Internationalisation:** Built scalable i18n system supporting 500+ translation strings across multiple languages, improving global usability by ~50%.

- **PDF Invoice Generation:** Built Thymeleaf HTML → ITextRenderer (Flying Saucer) → PDF pipeline streamed via HttpServletResponse — zero disk I/O, fully in-memory processing.
- **Excel Billing Export:** Implemented Apache POI XSSFWorkbook export with bold headers, format wrappers, and both paginated and full-dataset export modes.
- **Lucky Draw / Raffle System:** Developed full raffle engine — Prefix-Date-Seq ticket generation, pot management, prize tracking, randomised winner selection, and real-time spin UI.
- **Activity Program Insights:** Built merchant dashboard with monthly graphs, reward distribution, Top Customers/Beneficiaries with date-time filter — all role-scoped per merchant.
- **PWA Enhancements:** Integrated Web OTP API (auto-read SMS), Contact Picker API (max 10 contacts, duplicate filter), and Spring LocaleResolver supporting EN / Hindi / Kannada.

Personal Project ([Clienttrade](#) : Explanations with Screenshots)

- Clienttrade — Full-Stack CRM & Trade Platform (Personal Project) GitHub Java 17, Spring Boot 3, Spring Security, Hibernate/JPA, MySQL, Thymeleaf, **Claude API**, Apache POI, ITextRenderer **AI Chatbot** Assistant (Claude API): dual-mode AI — a general **pre-login** assistant and a domain-scoped, CRM-aware post-login assistant answering **live queries** on leads, contacts, priorities, and activities, while **rejecting** out-of-scope questions.
- Security architecture: **JWT + OTP + OAuth2** (Google & GitHub) in one system, with a custom OncePerRequestFilter for token validation and OTP rate limiting (HTTP **429** enforcement).
- Role-based data isolation: 3-tier hierarchy (Admin → Merchant Admin → Staff) with category/location scoping enforced at the SQL query level — zero data overlap between same-role users.
- DB-level audit trail: MySQL AFTER triggers capturing **field-level** before/after JSON snapshots for every **INSERT/ UPDATE/DELETE**, with zero application-side audit code.
- Automated health monitoring: Spring **@Scheduled** system checking infrastructure (**MySQL, Kafka, Redis, Groq AI, Ollama**), business **APIs**, and **UI** endpoints three times daily; emails color-coded HTML reports via JavaMailSender, tracks response times, and auto-purges reports older than 30 days.
- Lead lifecycle & billing: full lead CRM (Open → In-Process → Proposal → Closure) plus a cart/billing system with **dynamic recalculation** on cancellation and zero-disk-I/O PDF invoice streaming via ITextRenderer.
- Reporting, PWA & more: insights dashboard with Excel export (Apache POI); Web OTP, Contact Picker, and Geolocation APIs; Lucky Draw/raffle system; FAQ module; and a 3-language UI (English, Hindi, Kannada) with no page reload.

Projects and Features

- **Employee CRUD (Spring Boot + React):** full-stack employee management app with a Spring Boot REST API backend and a React frontend, clean separation between API and UI layers.
- **Employee Management (Spring MVC + Hibernate):** CRUD system using Spring MVC and Hibernate ORM with proper MVC separation and session management.

Education

- **M.Tech in Structural Engineering at Visvesvaraya Technological University - Belagavi, India (2020)**
- **B.Tech in Civil Engineering at Ramaiah University Of Applied Sciences - Bangalore, India (2018)**
